

AFTER SALES

Attending the LNG/LPG market for more than 30 years made us innovative and steadily improving our fields. Our project supplies, maintenance jobs and sparepart supports brought us in the position to set up progress and reliability together. Fast reacting on customers demand is one of our leading intentions. Keeping an eye on state of the art equipment is our policy to support with progressive ideas.

We provide a high-volume stock for the LPG/LNG market. We also store rare and uncommon rawmaterials like cryogenic plates, pipes and supports. Due to our close and long-term relationships to well-known and established manufacturers we have access to manufacturing and procurement processes to enable even the impossible! Our stocking process is ISO 9001:2015 certified by GL.

...we serve for your safety!
